Civills

Programme Duration:

3 Months

Ardmore & Cappoquin Interim System was the provision of treatment facilities for the removal of solids from the existing sewerage treatment system in Ardmore and Cappoquin for Waterford County Council. The works entailed the construction of a sub-surface structure to house the solids removals equipment.

Both projects were tendered competitively and were awarded as a bundle. The projects included the following elements:

- Excavation & Disposal
- Reinforced Concrete tank formation
- Waterproofing works
- Gantry and railings
- Pumping and pipework

The projects were both completed on time and on budget to the satisfaction of the client Waterford Co Co and Mot Mc Donald consulting Engineers.
